AI-Assisted ASC 606 Contract Review

Companion test workbook to workpaper REV-AI-2026-01

Meridian Harbor Software, Inc. (fictional) | FY2026 Q4 close readiness | Fictional data

This is a training and portfolio sample. The entity, vendor, customers, people, contracts, amounts, test results and findings are fictional. The workbook supports the Markdown and PDF workpaper but does not replace it. Values are static: they were computed from the same data module that renders the workpaper, not by spreadsheet formulas.

Sheet	Contents
Contract Register	25-contract test sample with model and reviewer results
Risk Register	16 risks, inherent and residual ratings, mapped to NIST AI 600-1
Control Matrix	14 controls with objective, operation, owner, evidence and test result
Control Tests	Test method, sample size, exceptions and conclusion for each control
Test Cases	14 test cases: objective, expected behavior, actual result and conclusion
Findings	4 findings and 3 observations with condition, cause, effect and owner
Remediation	Remediation actions and next steps with due dates and closure evidence
Evidence Log	16 evidence artifacts with format, retention, integrity and control linkage
NIST Mapping	Applicability decision and treatment for the 12 NIST AI 600-1 GenAI risks
Metrics	Accuracy, agreement, correction and timing metrics
Change Log	Version history of this workbook

Key metrics

Contracts tested	25 of 240
Sample contract value	$28,536,000
Field-level extraction accuracy	94.4% (236 of 250 checks)
Contracts accepted without change	20 of 25 (80%)
Gross effect of corrections	$760,047 (92.1% of performance materiality)
Errors that reached the ledger	0
Controls rated effective	12 of 14
Findings and observations	4 findings, 3 observations
